

CS-331 Assignment 1 (Java)

Tejas Khairnar

Roll Number : 180101081

Running the Code in a linux based system:

1. Make sure Java is installed on your machine.
2. Open the terminal and change the directory to the directory of the source (.java file) code.
3. Type `javac <Program_Name>.java` in the terminal and press enter to compile your code.
4. Now, type `java <Program_Name> <number_of_threads_as_argument>` in the terminal and press enter to run the program.
5. If the number of threads is not between 4 and 16 the output console will print an error message.

NOTE : All the instructions are also given in each source code file.
